

Estimated Costs Involved in Transporting an Elevate House to Site

The cost of transporting a building from our Cambridge yard to your site will vary depending on travel distance, the route to site and site/ access difficulty etc. We'll put you in touch with quality and experienced home transport companies, who will look after all aspects of the building transportation. Here are some ballpark figures to give you an idea of transport cost from Cambridge to the following regions:

Northland	\$60K
Auckland	\$50K
Waikato	\$45K
Bay of Plenty	\$50K
Gisborne	\$55K
Hawkes Bay	\$55K
Taranaki	\$50K
Manawatu- Wanganui	\$50K
Wellington	\$60K

Transport pricing is indicative only, as it can vary depending on factors such as the size of the building, road access, and the distance to site. We're happy to check your specific address and provide a more accurate estimate based on the actual route.

In some cases, particularly on routes with narrow roads or overhanging trees and foliage, additional protection may be required for the home during transport. This can include edge protection or a full timber frame with plywood. The cost for this typically ranges from around \$3,500 to \$10,000, depending on the level of protection needed. Once the home has arrived on site, the protection is removed by the client or a local tradesperson.

Note: The estimated costs above include the piling and installation, assuming a relatively flat site. Steep sites or sites that have poor soil conditions may require a building contractor to install the piles before the building arrives at site. Our buildings can also be craned on to site if required.
