

About Elevate Homes

Elevate Homes is an award-winning company that has flipped the notion of flimsy prefabricated housing on its head and focuses on creating quality, high-end housing that incorporates a contemporary, innovative take on relocatable homes. These stunning architecturally designed buildings are built in a controlled environment meaning a stress-free, faster build time and high-quality finish.

Standard house models range from a compact 70m² home, to a family friendly, 4 bedroom/ 2 living home - all of which are ingeniously designed to create a sense of spaciousness, maximize light, reduce wasted areas and are finished to a high and exacting standard.

Mind you, with an in-house architectural and interior design team, there is no such thing as 'standard'. An Elevate home incorporates the vision, ideas and house goals of each client with the end result, a beautifully bespoke home.

Why Elevate Homes?

Architecturally designed and beautifully crafted: Elevate homes are designed by an innovative, long-established architectural team and are renowned for their efficient use of space and light with easy living layouts and stunning contemporary designs. With designers at your fingertips during the entire process, you get to incorporate custom design and bespoke elements that make your home truly and uniquely yours.

Seamless hassle-free design and build experience: Designing and building a house can be stressful but an Elevate home is delivered to your site fully complete and ready to go. After an initial meeting you can simply sit back, relax and let Elevate's experienced team bring your new home to life.

Cost effective and fast build times: A house built in a controlled environment can be constructed up to 40% quicker than a conventional home, saving you significantly on labour cost alone. The more streamlined construction process also ensures less downtime and reduced waste.

Quality controlled: Continuity of tried and tested materials and tradespeople, consistent building systems and dedicated project management, as well as having the architectural team on site, ensures quality control and consistency at every stage of the process.

Cost transparency with no surprises: With Elevate the costs of the build are communicated from the outset. The team provide regular, comprehensive updates during the build process, so you know exactly what's going on and what you're getting.

Key Features of an Elevate Home

Award-winning design

Attention to detail and award-winning design are characteristics common across Elevate homes. Each house is designed to maximize light and create a sense of space throughout.

Warm, dry, healthy homes

All homes are fully insulated to meet the latest NZ Building Code regulations. Exterior windows and doors are thermally broken with double glazed, argon filled, low-E glass for highly efficient insulation and a rigid bracing layer wraps the full perimeter of the building to ensure extra stability and a warmer, healthier home.

Bespoke custom-made kitchens and cabinetry

Highly specified kitchens are the heart of an Elevate home. Stone worktops, sleek soft close drawers and doors, quality appliances and tapware are just some of the features that blend form and function in these custom-made kitchens.

High-end fittings and finishes

Premium European and NZ engineered bathroom and tapware has been selected as standard for Elevate homes, based on their quality, design and function. A selection of premium carpets and stylish, commercial-grade laminate planking are used underfoot, and stunning pendant and LED lighting are amongst a host of special features that set these homes apart.

Stunning storage solutions

Floor to ceiling, extra wide bedroom wardrobes, deep and ample cupboards in kitchens and smart hidden-away storage in bespoke cabinetry units are elegant and handy features of these homes. So practical, yet so very stylish.

What our clients had to say...

"The reason we chose an Elevate Home was due to their enthusiasm and passion to produce a high-end, quality and cost effective architectural transportable. We wanted to have certainty on build cost and felt that the transportable would give us a lot more assurance around the price compared to building on site. Nothing was a problem. Quality control is on site with the team. Building consents, engineers, interior design - it was all done for us - the build was an absolute breeze."

Elevate Box 131 Homeowners, Whangapoua

"We have had so many people come and knock on our door asking about our house, they can't believe it's a transportable home, on average we have had one person a day walk in over the summer and talk to us about the house and have shown a few people through it as well. The house has been the talk of Whangamata and we have had such positive feedback, everyone just loves it."

Elevate Lite Barn 130 Homeowners, Whangamata

"The building process and dealing with the Elevate Homes team was wonderful. We have loved the whole process. It was a shame when it came to an end. We would certainly recommend them - and we do - as often people (strangers) call in to talk about our new house and we love showing them around it."

Elevate Box 130 Homeowners, South Wairarapa

"We had no idea where to start! The Elevate team are honestly like Fairy God Mothers, we told them what we wanted and they just made it all happen."

Elevate Barn 148 Homeowners, Mangawhai

"From start to finish, this has been a breeze. We were so well looked after; nothing was too much trouble and the whole team is professional and so easy to deal with. We absolutely love our new home."

Elevate Barn 140 Homeowners, Wairarapa

"The house is just incredible and beautiful, we are just so thrilled with the result. We loved the concept from day one but the result we have has surpassed our dreams and expectations. It really means more than you can imagine - we all truly love it!"
