Tilt 150 Show Home

This spacious and beautifully appointed house has all of the features you've come to expect in a design and quality focused Elevate home. The open plan living and dining area boasts a 5.5m over wall stacker door allowing seamless indoor/outdoor flow, with the stacker door opposite, further promoting the illusion of bringing the outdoors in.

A considered design makes efficient use of the internal space with features employed to create a sense of openness, maximize light and reduce wasted areas. Ingeniously designed nooks and spaces featured throughout, include a cleverly concealed scullery and laundry, an intimate office alcove and an in-built entertainment unit with elegant cocktail bar. These space saving elements and the use of rich and opulent textures, colours and finishes lift the home to next level style and luxury.

The soaring ceiling in the main area, adds architectural drama and is accentuated by stunning LED strip lighting. The over-height ceiling and internal doors plus floor-to-ceiling cabinetry throughout add to the spacious feel of the interiors.

Commercial grade laminate flooring and premium carpet are used for durability and elegance, and the enviable ensuite and bathroom are fitted with quality European and NZ engineered bathroom and tapware.

The contemporary mix of cladding is tailored to coastal and high wind zones, with severe weather grade steel paired with sustainably grown Western Red cedar.

So, for a next level pre-built home with added 'X Factor', get in touch with Elevate Homes to arrange a viewing today.

Note: The Tilt 150 show home includes some upgrades and additions to the standard Elevate 150 home. Contact Elevate Homes or visit www.elevatehomes.co.nz for a standard specification list.
